Price List valid from 01.01.2025 till 31.12.2025

## Attachment to the Price list of WAPI services in Slovakia

Please be informed about additional service conditions related to current price list:

### Parcel tariff weight calculation

The Tariff weight is the actual or the dimensional weight of a shipment - the larger of the two is charged rounded to the next half kilogram.

The actual shipment weight is the total sum of the weight of all its parts - products and packaging material (measurement from scales).

The dimensional weight of the shipment is calculated in kg based on package dimensions by multiplying the width (in cm) x the length (in cm) x the height (in cm) / 5000

### Courier services restrictions (cm/kg)

#### Restrictions of Packeta

For Slovakia bulky formula is: Length > 120 OR (Length+Width+height > 150) OR WeightGross > 15

#### Restrictions of DPD

For Slovakia bulky formula is: Length > 175 OR (Length+2\*Width+2\*Height > 300) OR WeightGross > 31.5

#### Restrictions of DHL

For Slovakia bulky formula is: Length > 120 OR Width > 60 OR Height > 60

Please note that restrictions for international deliveries may vary from mentioned domestic restrictions.

Please consult your Key Account Manager to get more info on courier restrictions in other counties.

### Courier service limited liability

Please note that courier limit of liability determines the maximum amount of money that carriers can be held liable for in the event of damage or loss of the parcel.

To submit a claim in case of loss or damage, courier service demands to provide proof of value, which refers to the acquisition/purchase/manufacturing value of the product (cost invoice, not commercial invoice).

Please consult your Key Account Manager to get more info on limited liability amounts of specific couriers.
